

Welcome to the future.

*“We can never know about the days to come.
But we think about them anyway.”*
— Carly Simon

Ancient Egyptian Divination, featuring Prof. Peter der Manuelian (Harvard Semitic Museum)

“Most companies who do live traffic **compare** their predictions against actual time in traffic to tune their algorithms and data sources. The likely result of this is that the companies who have access to the best usage data ... are likely to end up with the best predictions in the medium to long term.”

Framework for Predictive Systems

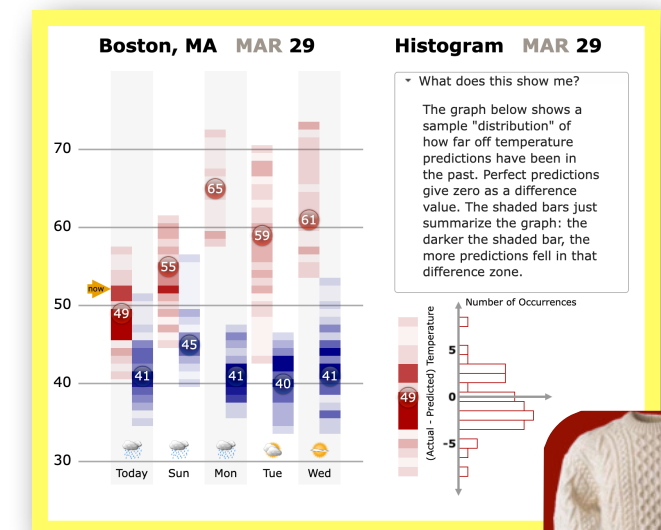

EVALUATE
ACCURACY

Uncertainty is a measure of certainty

Models that were used in the IPCC 4th Assessment Report can be evaluated by **comparing** their approximately 20-year **predictions** with **what actually happened**. In this figure, the multi-model ensemble and the average of all the models are plotted alongside the NASA Goddard Institute for Space Studies (GISS) **Surface Temperature Index (GISTEMP)**. Climate drivers were known for the 'hindcast' period (before 2000) and forecast for the period beyond. The temperatures (in degrees Celsius) are plotted with respect to a 1980-1999 baseline.

Major Civilizations in Mesopotamia

Timeline of Major Mesopotamian Civilizations:

1. Sumer ~ 3500 – 1900 BC
2. Akkadia ~ 2334 – 2155 BC
3. Babylonia ~ 1900 – 539 BC
4. Assyria ~ 2500 – 605 BC
5. Persia ~ 550 – 334 BC

"When Knowledge Conquered Fear"

"When Knowledge Conquered Fear" is the third episode of the American documentary television series *Cosmos: A Spacetime Odyssey*. It premiered on March 23, 2014 on Fox, and premiered on March 24, 2014 on National Geographic Channel. [Wikipedia]. [IMDB link](#) Reproduced without permission—please do not distribute.

Prediction Essentials

Take a look at the essential elements of the course, including the framework for predictive systems.

Omens & Oracles

Gain insight into prediction as a human venture by studying the most ancient forms of prediction in Omens and Oracles.

Rise of Theory

Learn how humanity moved from mystical divination practices to genuine, scientific theories to explain natural phenomena.

Modern Prediction

Discover the cutting edge predictive methods and modeling from preminent experts across many fields.

Science is so much more than equations and lab coats. It requires human creativity, ingenuity, argument, and persistence.

The goal of the Paths to Science is to deepen students,' scientists,' and the broader public's appreciation of science by telling stories of its history.
